

The Experiential Tourism Platform of Northeast Brazil

Connecting travelers to authentic experiences in Natal and the region

hubturis.com.br | Natal, RN, Brazil | 2026

THE REAL PROBLEM

The market in Natal generates **R\$ 2.3 billion per year** and operates in an **analog and fragmented** way.

On the provider side:

- ✗ Sells tours through WhatsApp with no management system
- ✗ No control over bookings, availability, or payments
- ✗ Invisible to tourists who arrive without a referral
- ✗ No data about their own performance

On the consumer side:

- ? Arrives in Natal not knowing what to book safely
- ? No verified reviews of local experiences
- ? No reliable platform to compare prices and experiences
- ? Depends on word of mouth or hotel desks

"The market gap: Global platforms ignore local Northeastern nuances."

THE SOLUTION

A marketplace specialized in tourism experiences that solves both sides simultaneously.

PROVIDER ↔ CONSUMER

Tour guides ↔ Domestic tourists

Buggy companies ↔ Intl tourists

Boat tours ↔ Locals leisure

Gastronomy ↔ Corporate travelers

Ecotourism ↔ Families & groups

For Providers: complete management, digital visibility, guaranteed payment

For Consumers: safe discovery, online booking, verified reviews

For the Region: digitization of the sector, local income generation, tourism data
